Dear Sir or Madam,

I would like to apply for a research grant in the category of cancer-related studies. I am investigating the genetic basis of human ovarian carcinoma by searching for non-random allele losses as a first step in locating a putative tumor suppressor gene. I am a new principal investigator in my first faculty position. If the above project falls within the scope of a category currently being funded, I would appreciate receiving application instructions. Thank you very much. Sincerely,

Nancy Phillips

Nancy Phillips, M.D.
Assistant Professor, Pathology
